

Sprint 1 Review

Expectations

1. Completed use-cases covering broad use of the system.

Comments: Good work on the Use cases.

2. Created UML covering the system.

Comments: Could have improved on the UML diagrams.

3. Version₀ project created in team repository, being worked by team following software dev standards, and deployed to AWS using Jenkins.

Comments: Base version of project was ready and deployed to AWS using Jenkins.

4. Demonstrated use of Jira.

Comments: Back-log had no tasks. Utilize JIRA better. Add more tasks and prioritize them. Most of the items were added couple of days before Sprint review.

Grade: B+
